## SKILLS OVERVIEW

### Ingenuity

I am creative and bona fide. Along with knowing the technical aspects of design such as color and composition, all of my ideas are my own. I invest myself into each piece that I bring to life, and my art is a part of me. I have been and always will be an artist.

### Design & Composition

Art and design show that we are a civilization, and they are my passions. I work in print, designing posters, t-shirts and pamphlets, but I also compose with more traditional media, such as oil paint and charcoal. My work—with every medium—must and will have an impact and make a statement.

### Video Editing

I am very interested in film and editing, and every major endeavor has taught me something that I had not known before. I am proficient in color correction as well as in creating special effects using Motion. I am extremely passionate about my work, and I am equally passionate about learning from it.

## COMPUTER SKILLS

Photoshop	ACID Pro
Illustrator	Dreamweaver
InDesign	HTML
ImageReady	CSS
Final Cut Pro	Office
Motion	Mac & PC Support
Soundtrack
